

INNOVATIVE DESIGN ENGINEERING

HLK-2260 180° Heavy Duty Rotary Actuator:

The HLK-2260 Heavy Duty Rotary Actuator is designed to rotate manipulator arms to enable a rotating access for inspection and positioning tasks. Different mounting plates can be fitted to accommodate a range of mounting styles. The double rack and pinion ensures a very robust arrangement, which has the minimum of backlash.

Specification:

Dimensions	Height	100 mm
	(excluding arm mount)	
	Width	290 mm
	Depth	125 mm
Function	Rotation	180°
Weight	Weight in air	6.7 Kg
	Weight in water	5.4 Kg
Material	316 SS	
	HE 30 Hard anodised aluminium alloy	
Hydraulics	Pan torque	260 NM @ 140 BAR
	Max working pressure	210 bar
Ports	.	1/8 NPT
