

Specially formulated Anti-Corrosive Lubricant for ROV Umbilical Protection

Keeps Your Umbilical Corrosion Free

Snokote manufactured by Rovsco in Houston, Texas is a corrosion control product for use in marine environment. It is specially effective on ROV steel armored umbilical and wire ropes that are continuously in use in subsea applications.

Snokote is unique in the way it provides protection. After its first application. Once applied it forms a bond with the metal, staying in place during the cable use, keeping seawater from coming in contact with the metal.

Through maintaining a regular schedule of coating ROV umbilical, you can extend its life and save on umbilical replacements.

For Easy & Effective application of Snokote, use Rovsco Cable Lubrication Equipment
