

XTREME™ Cable Lubricator

High Pressure Lubricator for ROV Lift Umbilicals & Wire Ropes

Xtreme™ Cable Lubricator

Designed by Rovsco engineers to fully lubricate (inner layers and surface) of ROV Umbilicals and wire ropes to protect against corrosion, with Rovsco's Snokote-CL corrosion inhibiting lubricant. It is used in conjunction with high pressure lubricant pumps supplied by Rovsco.

The Xtreme cable lubricators are used to coat new cables before they go into service or existing cables already in the field. The lubricating process does not hinder or stop the regular offshore work schedule, as the lubricator can be installed, used and removed without effecting the ongoing operations.

The ease of installation, use and removal of this tool lets the offshore personnel maintain a regular lubricating schedule of their ROV umbilicals to keep them corrosion free.

Features

- ◆ Can withstand high lubricant pressures
- ◆ Accommodates a wide range of cable diameters
- ◆ Unique seal design – ensures lubricant penetration within the inner layers of the armor wires resulting in total lubrication and displacement of any trapped seawater
- ◆ Provides a thin but thorough coating, thus preventing any wastage of lubricant
- ◆ Easy Installation, use and removal at work sites without hindering work schedules
